A Book for Midwives

Care for pregnancy, birth, and women’s health

Susan Klein, Suellen Miller, and Fiona Thomson

Berkeley, California, USA
Hesperian Health Guides and the contributors to *A Book for Midwives* do not assume liability for the use of information contained in this book.

All health workers have a responsibility to be honest with themselves and the people they care for about the limits of their skills. This means: only perform the procedures you are trained to. Find help from other, more experienced health workers when a woman needs a kind of care that you are not experienced with. Seek the advice of local health workers and medical authorities about the safest ways to practice in your area. This manual can help you learn new skills, but no book can take the place of hands-on training with a skilled and experienced teacher. Keep watching, reading, listening, and learning more whenever you have the chance.

The first edition of this book was imagined, written, and illustrated by Susan Klein. Sadly, she died before it was published. This new revision is still carried largely by her writing, her drawings, and we hope, her vision — that *A Book For Midwives* would be a tool enabling all those who attend women in childbirth, regardless of their educational background, to exercise independent judgment and to make the best possible decisions at each birth.

Credits for the 2009 and 2013 editions: This updated, corrected printing relies heavily on the generously offered, wise counsel of midwives Ellen Israel, Ellen Lapowsky, Suellen Miller, Judith Standley, and Sarah Wallis; and Drs. Reuben Granich, Lisa Keller, Scott Oesterling, Linda Spangler, Amy Stenson, and Lorna Thornton. Editorial and design work by Shu Ping Guan, Todd Jailer, Jane Maxwell, Susan McCallister, Kathleen Tandy, Dorothy Tegeler and Fiona Thomson.
Thanks

Only with the collaboration of hundreds of advisors, reviewers, writers, artists, and others was it possible to create this book.

Every staff member, intern, and volunteer here at Hesperian Health Guides helped bring this book into the world, including those who raise funds, manage finances, publicize our books, and pack and ship them around the world. Outside our office, dozens of reviewers helped decide what this book should cover and how to do it. Groups of midwives and midwifery students in 10 countries critiqued early versions to make it as useful, appropriate, and accurate as possible. Midwives, doctors, and other health workers, trainers, and specialists volunteered their time to ensure the accuracy and clarity of the material here.

Along with our tireless medical editors, we called on a few reviewers over and over again, and they deserve special mention here. Thank you Deborah Billings, Lisa de Avila, Ruth Kennedy, and Karen Strange.

The following organizations contributed time, resources, and critical thinking: Averting Maternal Death and Disability (AMDD) in the US; ASECSA in Guatemala; The Bangladesh Women's Health Coalition; The Berkeley Midwives Study Group in the US; El Centro Para los Adolescente de San Miguel de Allende (CASA) in Mexico; Centre For Rural Studies and Development in India; El Centro de Atención Integral de la Pareja in Mexico; The International Confederation of Midwives; The Integrated Midwives Association of the Philippines; Inuulitsivak Maternity Center in Canada; Ipas in the US, Ghana, and Kenya; Ixmucane and Midwives for Midwives in Guatemala; Jamkhed Comprehensive Rural Health Program in India; Kampot Hospital Maternity Center in Cambodia; the Maryknoll Sisters and the VEMA training center of Tanzania; Pathfinder in Peru; and the Reproductive Health Research Unit at the University of the Witwatersrand, Chris Hani Baragwanath Hospital in South Africa.

Thanks to the following publishers who gave us permission to use drawings: Family Care International, from *Healthy Women, Healthy Mothers*; Freedom From Hunger; and Pesticide Action Network Asia and the Pacific, from *Breaking the Silence! Plantations and Pesticides*.

Our deep gratitude goes to everyone who gave their time, thoughts, and knowledge so generously, both to the original edition of *A Book for Midwives* and to this revision. Your commitment to health for all is what brought this book into the world. Thank you:

Finally, thank you so much to the individuals and foundations who financially supported this project: Allan S. Gordon Foundation; Anna Lalor Burdick Program of the Lalor Foundation, Inc.; Averting Maternal Death and Disability Program, Heilbrunn Center, Mailman School of Public Health, Columbia University; Compton Foundation, Inc.; Conservation, Food and Health Foundation, Inc.; David and Lucile Packard Foundation; Dorothy and Jonathan Rintels Charitable Foundation; Erik E. and Edith H. Bergstrom Foundation; Ford Foundation; International Confederation of Midwives; Jadetree Foundation; Jeanne Kemp; Salt-Bush Fund of the Tides Foundation; Ruth Sherer; and the United Nations Population Fund.

Additionally, the incredible patience and support of our families and friends during the long process of producing this book allowed us to see the project through.
How to use this book

Finding information
To find information, use the Contents, the Index, or the Tabs.

The Contents at the beginning of this book list the name of each chapter in the order in which it appears. Contents of each chapter are also listed at the beginning of that chapter.

The Index, or the yellow pages at the back of this book, lists all the topics covered in this book in the order of the alphabet (a, b, c, d...).

Each page in this book has a number at the bottom. To find a chapter or topic in this book, find it in the contents or index, and then turn to the page number listed next to it.

Tabs on the right-hand pages separate most of the book into 5 sections. You can quickly find the information on staying healthy, infection prevention, pregnancy, labor and birth (including postpartum), and on other health skills, by turning to the sections labeled with those tabs.

Warnings, medicines, and notes
Warnings, medicines, and notes are separate from the main text.

Warning boxes show very important information. When you see this kind of box, you must take action to avoid danger.

**WARNING!** Do not insert an IUD for a woman who has signs of infection. The infection can spread to the womb.

Medicine boxes show how to give medicines. Read these boxes very carefully, and always look in the green medicines pages starting on page 463 before giving a medicine.

To lower a fever
- give 500 to 1000 mg paracetamol.................................by mouth, every 4 to 6 hours.

Notes show information that is useful, but not directly connected with the information around it.

**Note:** Clean hands do not stay clean for long. If you touch anything other than the mother’s genitals, you must wash again.
Understanding pictures of the body

How we show the outside of the body
When we draw a person, we try to draw her whole body. If we do not have enough room, we only show part of her body.

This picture shows a mother pushing her baby out of her vagina. If it is important to see the baby’s head and the vagina more clearly, we will show only that part of the body, so we can make the picture bigger.

How we show the inside of the body
Sometimes we need to show what is happening inside a woman’s body. So we include pictures that show what a woman’s body would look like if you could see inside of her.

Usually, we use thick lines to show the outside of a woman’s body, and thin lines or dotted lines to show what is happening on the inside.

A note on language

Medical and technical words Throughout this book, we try to use easily understood words for parts of the body and things that the body does. We also explain the medical words we use. If there is a medical or technical word you do not understand, you can look it up in the index and see if it is explained in the book. Or you can look in the glossary on page 503, which lists some medical and technical words that are useful to know.

He and she When talking about babies, we did not want to say “he or she” each time because it can be awkward. So sometimes we say “she,” and sometimes we say “he.”

Getting help
The information in this book is not always enough to help you solve a health problem. When this happens, get help! Depending on the problem, you should:

Get medical advice. A skilled health worker or doctor should be able to help you decide what to do. This is not usually an emergency.

Get medical help. The woman or her baby need to see a skilled health worker or doctor for tests or treatment as soon as possible.

Go to a medical center or hospital. There is an emergency. Take the woman or her baby to a hospital right away for surgery or other immediate help.

## Chapter 8: Prenatal checkups

- Talk with the mother ........................................ 109
- Check the mother’s body .................................. 116
- Check for signs of anemia ................................. 116
- Weigh the mother ............................................ 118
- Check the mother’s temperature ....................... 119
- Check the mother’s pulse ................................. 120
- Check the mother’s blood pressure ................. 122
- Check for signs of pre-eclampsia ..................... 125
- Signs of bladder or kidney infection. ............... 128
- Check the baby ............................................. 130
- Measure the mother’s womb ......................... 130
- Find the position of the baby ......................... 135
- Listening to the baby’s heartbeat ................... 139
- What to do if you find warning signs ............. 142
- After the checkup ....................................... 144
- Record of prenatal care ................................. 145

### LABOR AND BIRTH

**Introduction** ................................................................................. 146

## Chapter 9: Getting ready for labor and birth

- Signs that labor will start soon .......................... 149
- When to go to the birth ................................. 151
- What to bring to a birth ................................ 151
- Sterilize your tools and wash up ...................... 153

## Chapter 10: Giving good care during labor and birth

- What happens during labor and birth .............. 155
- Care for the mother during labor .................. 157
- Be ready for emergencies .............................. 163
- Keep a record of what happens during labor .......... 164

## Chapter 11: Opening: stage 1 of labor

- What happens during stage 1 ....................... 167
- When you first arrive .................................... 168
- Helping the mother relax in stage 1 ............... 169
- Signs for the midwife to check in stage 1 .......... 170
- The baby’s position ....................................... 170
- The baby’s heartbeat .................................... 172
- The bag of waters ....................................... 174
- The mother’s pulse ...................................... 178
- The mother’s temperature ......................... 178
- The mother’s blood pressure ...................... 180
- Bleeding during labor ................................. 183
- Pain in the womb ....................................... 183
- Watch for signs of progress ....................... 185
- Safe ways to encourage labor .................... 191

## Chapter 12: Pushing: stage 2 of labor

- Watch for signs that stage 2 is near or starting .... 195
- What happens during stage 2 ....................... 197
- Help the mother have a safe birth ............... 199
- Watch for warning signs ............................ 202
- Help the mother give birth ......................... 206
- Baby is breech ........................................ 215
- Delivering twins ..................................... 219
- Baby is very small or more than 5 weeks early ........ 221
Chapter 13: The birth of the placenta: stage 3 of labor
- Check the mother’s physical signs
- Bleeding after birth
- Watch for signs the placenta has separated
- Help her push out the placenta
- Watch for bleeding after the placenta is born
- What to do for the baby

Chapter 14: The first few hours after the birth
- What to do for the mother
- What to do for the baby
- General appearance
- Breathing, heartbeat, temperature
- The baby’s body
- Clean up and answer questions

Chapter 15: The first weeks after the birth
- What to do for the mother
- Watch her womb and bleeding
- Watch for signs of womb infection
- Watch for signs of vaginal infection
- What to do for the baby
- Encourage the baby to breastfeed
- Care for the cord
- Look for signs of infection
- Watch the color of the baby’s skin and eyes

Chapter 16: Breastfeeding
- Breast is best
- How to breastfeed
- When the mother works outside the home
- Common difficulties while breastfeeding
- Situations that affect breastfeeding
- Alternatives to breastfeeding

HEALTH SKILLS

Chapter 17: Family planning
- Choosing a family planning method
- Chart: family planning methods
- Making family planning work for the community

Chapter 18: Sexually transmitted infections (STIs)
- What are STIs?
- Discharge from the vagina
- Sores on the genitals
- STIs that affect the whole body
- Teaching women how to prevent STIs
- How to help stop STIs in your community

Chapter 19: Advanced skills for pregnancy and birth
- Vaginal exams during labor
- Home methods for starting labor
- Injections
- How to give fluid through a vein
- Catheters
- Episiotomy
- Sewing a tear or an episiotomy
- Caring for a woman after female genital cutting (circumcision)
- Turning a breech or sideways baby

A Book for Midwives (2013a)
