

# A Book for Midwives

Care for pregnancy, birth,  
and women's health

**Susan Klein, Suellen Miller,  
and Fiona Thomson**

Oakland, California, USA

Hesperian Health Guides and the contributors to *A Book for Midwives* do not assume liability for the use of information contained in this book.

All health workers have a responsibility to be honest with themselves and the people they care for about the limits of their skills. This means: only perform the procedures you are trained to. Find help from other, more experienced health workers when a woman needs a kind of care that you are not experienced with. Seek the advice of local health workers and medical authorities about the safest ways to practice in your area. This manual can help you learn new skills, but no book can take the place of hands-on training with a skilled and experienced teacher. Keep watching, reading, listening, and learning more whenever you have the chance.

The first edition of this book was imagined, written, and illustrated by Susan Klein. Sadly, she died before it was published. This revision still rests on her writing, her drawings, and we hope, her vision — that *A Book For Midwives* would be a tool enabling all those who attend women in childbirth, regardless of their educational background, to exercise independent judgment and to make the best possible decisions at each birth.

**Credits for the 2009, 2013, 2020, 2021, 2022, and 2024 editions:** This updated, corrected printing relies heavily on the generously offered, wise counsel of midwives Ellen Israel, Ellen Lapowsky, Suellen Miller, Judith Standley, and Sarah Wallis; and Drs. Reuben Granich, Lisa Keller, Scott Oesterling, Naman Shah, Linda Spangler, Amy Stenson, and Lorna Thornton. Editorial and design work by Dani Behonick, Shu Ping Guan, Todd Jailer, Jane Maxwell, Susan McCallister, Kathleen Tandy, Dorothy Tegeler, Fiona Thomson, and Paula Worby. The 2024 edition was coordinated by Dani Behonick with support from Kate Bobrow-Strain, Todd Jailer, Susan McCallister, and Kathleen Tandy.

---

# Thanks

Only with the collaboration of hundreds of advisors, reviewers, writers, artists, and others was it possible to create this book.

**Every staff member, intern, and volunteer here at Hesperian Health Guides helped bring this book into the world**, including those who raise funds, manage finances, publicize our books, and pack and ship them around the world. Outside our office, dozens of reviewers helped decide what this book should cover and how to do it. Groups of midwives and midwifery students in 10 countries critiqued early versions to make it as useful, appropriate, and accurate as possible. Midwives, doctors, and other health workers, trainers, and specialists volunteered their time to ensure the accuracy and clarity of the material here.

**Along with our tireless medical editors, we called on a few reviewers over and over again**, and they deserve special mention here. Thank you Deborah Billings, Lisa de Avila, Ruth Kennedy, and Karen Strange.

**The following organizations contributed time, resources, and critical thinking:** Averting Maternal Death and Disability (AMDD) in the US; ASECSA in Guatemala; The Bangladesh Women's Health Coalition; The Berkeley Midwives Study Group in the US; El Centro Para los Adolescentes de San Miguel de Allende (CASA) in Mexico; Centre For Rural Studies and Development in India; El Centro de Atención Integral de la Pareja in Mexico; The International Confederation of Midwives; The Integrated Midwives Association of the Philippines; Inuulitsivak Maternity Center in Canada; Ipas in the US, Ghana, and Kenya; Ixmucane and Midwives for Midwives in Guatemala; Jamkhed Comprehensive Rural Health Program in India; Kampot Hospital Maternity Center in Cambodia; the Maryknoll Sisters and the VEMA training center of Tanzania; Pathfinder in Peru; and the Reproductive Health Research Unit at the University of the Witwatersrand, Chris Hani Baragwanath Hospital in South Africa.

Thanks to the following publishers who gave us permission to use drawings: Family Care International, from *Healthy Women, Healthy Mothers*; Freedom From Hunger; and Pesticide Action Network Asia and the Pacific, from *Breaking the Silence! Plantations and Pesticides*.

**Our deep gratitude goes to everyone who gave their time, thoughts, and knowledge** so generously, both to the original edition of *A Book for Midwives* and to this revision. Your commitment to health for all is what brought this book into the world. Thank you:

Additionally, the incredible patience and support of our families and friends during the long process of producing this book allowed us to see the project through.

**Finally, thank you so much to the individuals and foundations who financially supported this project:** Allan S. Gordon Foundation; Anna Lalor Burdick Program of the Lalor Foundation, Inc.; Averting Maternal Death and Disability Program, Heilbrunn Center, Mailman School of Public Health, Columbia University; Compton Foundation, Inc.; Conservation, Food and Health Foundation, Inc.; David and Lucile Packard Foundation; Dorothy and Jonathan Rintels Charitable Foundation; Erik E. and Edith H. Bergstrom Foundation; Ford Foundation; International Confederation of Midwives; Jadetree Foundation; Jeanne Kemp; Salt-Bush Fund of the Tides Foundation; Ruth Sherer; and the United Nations Population Fund.

# How to use this book

## Finding information

To find information, use the Contents, the Index, or the Tabs.

The **Contents** at the beginning of this book list the name of each chapter in the order in which it appears. Contents of each chapter are also listed at the beginning of that chapter.

The **Index** at the back of this book lists all the topics covered in this book in the order of the alphabet (a, b, c, d...).

Each page in this book has a number at the bottom. To find a chapter or topic in this book, find it in the contents or index, and then turn to the page number listed next to it.

**Tabs** on the right-hand pages separate most of the book into 5 sections. You can quickly find the information on staying healthy, infection prevention, pregnancy, labor and birth (including postpartum), and on other health skills, by turning to the sections labeled with those tabs.

## Warnings, medicines, and notes

Warnings, medicines, and notes are separate from the main text.

**Warning boxes** show very important information. When you see this kind of box, you must take action to avoid danger.

**WARNING!** Do not insert an IUD for a woman who has signs of infection. The infection can spread to the womb.

**Medicine boxes** show how to give medicines. Read these boxes very carefully, and always look in the Medicines Pages starting on page 467 before giving a medicine.

These pictures show how the medicines in the box are given — in this case as tablets.

**To lower a fever**

- give 500 to 1000 mg paracetamol..... by mouth, every 4 to 6 hours as needed (do not take more than 4000 mg in a day).

**Notes** show information that is useful, but not directly connected with the information around it.

**Note:** Clean hands do not stay clean for long. If you touch anything other than the mother's genitals, you must wash again.

## Understanding pictures of the body

### How we show the outside of the body

When we draw a person, we try to draw her whole body. If we do not have enough room, we only show part of her body.

This picture shows a mother pushing her baby out of her vagina.

If it is important to see the baby's head and the vagina more clearly, we will show only that part of the body, so we can make the picture bigger.

### How we show the inside of the body

Sometimes we need to show what is happening inside a woman's body. So we include pictures that show what a woman's body would look like if you could see inside of her.

Usually, we use thick lines to show the outside of a woman's body, and thin lines or dotted lines to show what is happening on the inside.

## A note on language

**Medical and technical words** Throughout this book, we try to use easily understood words for parts of the body and things that the body does. We also explain the medical words we use. If there is a medical or technical word you do not understand, you can look it up in the index and see if it is explained in the book. Or you can look in the glossary on page 507, which lists some medical and technical words that are useful to know.

**He and she** When talking about babies, we did not want to say "he or she" each time because it can be awkward. So sometimes we say "she," and sometimes we say "he."

## Getting help

The information in this book is not always enough to help you solve a health problem. When this happens, get help! Depending on the problem, you should:

**Get medical advice.** A skilled health worker or doctor should be able to help you decide what to do. This is not usually an emergency.

**Get medical help.** The woman or her baby need to see a skilled health worker or doctor for tests or treatment as soon as possible.

**Go to a medical center or hospital.** There is an emergency. Take the woman or her baby to a hospital right away for surgery or other immediate help.

# Contents

## Introduction

### Chapter 1: Words to midwives ..... 1

Learning is lifelong . . . . . 1	Work to improve women’s health . . . . . 8
Share what you know . . . . . 3	Work for the joy of it. . . . . 11
Respectful and compassionate care . . . . . 6	

### Chapter 2: Treating health problems ..... 12

Finding the causes of health problems. . . . . 13	Finding root causes of health problems . . . . . 21
Finding the best treatment . . . . . 16	Midwives can make change . . . . . 25

### Chapter 3: A woman’s body in pregnancy ..... 26

A woman’s sexual and reproductive parts. . . . . 27	How women become pregnant . . . . . 29
---	--

### Chapter 4: Helping women stay healthy ..... 32

Eating well . . . . . 33	Things to avoid during pregnancy and breastfeeding. . . . . 45
Caring for the body for good health . . 42	

### Chapter 5: Preventing infection ..... 48

Preventing infection saves lives . . . . . 49	Clean the space and bedding . . . . . 57
Prevent infection by keeping germs away . . . . . 52	Clean and disinfect or sterilize tools . . 59
Clean your hands and wear protective clothing . . . . . 53	Get rid of wastes safely . . . . . 67

## PREGNANCY

### Introduction ..... 70

### Chapter 6: Common changes in pregnancy ..... 72

Changes in eating and sleeping . . . . . 73	Changing feelings and emotions . . . . . 82
Body changes and discomforts. . . . . 76	

### Chapter 7: Learning a pregnant woman’s health history ..... 84

Questions in a pregnancy health history . . . . . 86	Malaria. . . . . 98
Does she have signs of pregnancy? . . . 86	HIV. . . . . 99
How pregnant is she now? When is the baby due? . . . . . 88	What else in her life might affect her pregnancy and birth? . . . . . 104
Has she had any problems with past pregnancies or births? . . . . . 93	Community organizing for emergency care . . . . . 106

<b>Chapter 8: Prenatal checkups.....</b>	<b>108</b>
Talk with the mother. . . . .	109
Check the mother’s body . . . . .	115
Check for signs of diabetes. . . . .	115
Check for signs of anemia . . . . .	116
Weigh the mother . . . . .	118
Check the mother’s temperature . . . .	119
Check the mother’s pulse . . . . .	120
Check the mother’s blood pressure . .	122
Check for signs of pre-eclampsia . . . .	125
Check for sexually transmitted infections. . . . .	128
Signs of bladder or kidney infection . .	128
Check the baby . . . . .	130
Measure the mother’s womb . . . . .	130
Find the position of the baby. . . . .	135
Listening to the baby’s heartbeat . . . .	139
What to do if you find warning signs . . . . .	142
After the checkup . . . . .	144
Record of prenatal care . . . . .	145

## LABOR AND BIRTH

<b>Introduction .....</b>	<b>146</b>
---------------------------	------------

### **Chapter 9: Getting ready for labor and birth .....**

Signs that labor will start soon. . . . .	149	What to bring to a birth . . . . .	151
When to go to the birth . . . . .	151	Sterilize your tools and wash up . . . .	153

### **Chapter 10: Giving good care during labor and birth.....**

What happens during labor and birth. . . . .	155	Be ready for emergencies . . . . .	163
Care for the mother during labor. . . .	157	Keep a record of what happens during labor . . . . .	164

### **Chapter 11: Opening: Stage 1 of labor.....**

What happens during stage 1 . . . . .	167	The mother’s pulse . . . . .	178
When you first arrive. . . . .	168	The mother’s temperature. . . . .	178
Helping the mother relax in stage 1. .	169	The mother’s blood pressure . . . . .	180
Signs for the midwife to check in stage 1. . . . .	170	Bleeding during labor . . . . .	183
The baby’s position. . . . .	170	Pain in the womb . . . . .	183
The baby’s heartbeat . . . . .	172	Watch for signs of progress. . . . .	185
The bag of waters. . . . .	174	Safe ways to encourage labor . . . . .	191

### **Chapter 12: Pushing: Stage 2 of labor .....**

Watch for signs that stage 2 is near or starting . . . . .	195	Help the mother give birth. . . . .	206
What happens during stage 2 . . . . .	196	Baby is breech . . . . .	215
Help the mother have a safe birth . . .	199	Delivering twins . . . . .	219
Watch for warning signs . . . . .	202	Baby is very small or more than 5 weeks early. . . . .	221

<b>Chapter 13: The birth of the placenta: Stage 3 of labor .....</b>	<b>222</b>
Check the mother's physical signs . . .	223
Bleeding after birth . . . . .	224
Watch for signs the placenta has separated . . . . .	227
Help her push out the placenta . . . . .	227
Watch for bleeding after the placenta is born . . . . .	236
What to do for the baby . . . . .	240
<b>Chapter 14: The first few hours after the birth.....</b>	<b>246</b>
What to do for the mother . . . . .	247
What to do for the baby . . . . .	252
General appearance. . . . .	253
Breathing, heartbeat, temperature . . .	254
The baby's body. . . . .	256
Clean up and answer questions . . . . .	267
<b>Chapter 15: The first weeks after the birth .....</b>	<b>268</b>
What to do for the mother . . . . .	269
Watch her womb and bleeding . . . . .	270
Watch for signs of womb infection . . .	271
Watch for signs of vaginal infection . .	272
What to do for the baby . . . . .	274
Encourage the baby to breastfeed and watch how she grows . . . . .	274
Care for the cord . . . . .	277
Look for signs of infection . . . . .	277
Watch the color of the baby's skin and eyes. . . . .	279
<b>Chapter 16: Breastfeeding .....</b>	<b>280</b>
Breast is best . . . . .	281
How to breastfeed . . . . .	282
When the mother works outside the home . . . . .	284
Common difficulties while breastfeeding. . . . .	286
Situations that affect breastfeeding . .	291
Alternatives to breastfeeding . . . . .	294
<b>HEALTH SKILLS</b>	
<b>Introduction .....</b>	<b>296</b>
<b>Chapter 17: Family planning .....</b>	<b>298</b>
Choosing a family planning method .	300
Chart: family planning methods . . . .	301
Making family planning work for the community. . . . .	318
<b>Chapter 18: Sexually transmitted infections (STIs) .....</b>	<b>320</b>
What are STIs? . . . . .	321
Abnormal discharge from the vagina. .	323
Sores and growths on the genitals . . .	329
STIs that affect the whole body . . . . .	334
Teaching women how to prevent STIs. . . . .	336
How to help stop STIs in your community . . . . .	337
<b>Chapter 19: Advanced skills for pregnancy and birth .....</b>	<b>338</b>
Vaginal exams during labor . . . . .	339
Home methods for starting labor . . . .	341
Injections . . . . .	345
How to give fluid through a vein . . . .	350
Catheters . . . . .	352
Episiotomy. . . . .	354
Sewing a tear or an episiotomy . . . . .	356
Caring for a woman after female genital cutting (circumcision) . . . . .	367
Turning a breech or sideways baby . .	369

<b>Chapter 20: The pelvic exam: How to examine a woman's vagina and womb...</b>	<b>372</b>
When to do a pelvic exam . . . . .	374
Before the exam. . . . .	375
The pelvic exam. . . . .	376
<b>Chapter 21: How to insert an IUD</b> .....	<b>392</b>
Help a woman decide if an IUD is right for her . . . . .	394
Before you insert an IUD . . . . .	395
Inserting an IUD . . . . .	396
After you insert an IUD. . . . .	402
Removing an IUD . . . . .	403
<b>Chapter 22: Helping a woman after a pregnancy ends early</b> .....	<b>404</b>
Problems from a pregnancy that ends early . . . . .	405
Emergency care for problems after miscarriage or abortion . . . . .	410
Infection . . . . .	413
Bleeding. . . . .	416
Shock . . . . .	418
Work with the community to prevent unsafe abortions . . . . .	419
<b>Chapter 23: Manual vacuum aspiration</b> .....	<b>420</b>
Deciding when to do MVA . . . . .	422
Getting ready for the MVA . . . . .	423
Doing the MVA . . . . .	426
Problems with the MVA . . . . .	432
After the MVA . . . . .	434
<b>Chapter 24: Getting medical help</b> .....	<b>436</b>
What medical centers and hospitals can provide. . . . .	437
Getting to a medical center. . . . .	442
Working with medical centers and doctors . . . . .	442
<b>Chapter 25: Homemade tools and teaching materials</b> .....	<b>446</b>
Low-cost equipment . . . . .	447
Teaching materials. . . . .	451
<b>Medicines Pages</b> .....	<b>467</b>
When to use medicines. . . . .	467
How to take medicines safely. . . . .	468
How to give medicines . . . . .	471
Kinds of medicine . . . . .	474
Problem index. . . . .	476
Alphabetical list of medicines . . . . .	477
Oral contraceptives . . . . .	493
Medicines for HIV and AIDS . . . . .	495
<b>To learn more</b> .....	<b>503</b>
<b>Technical and medical words</b> .....	<b>507</b>
<b>Index</b> .....	<b>509</b>
<b>Due date calculator</b> .....	<b>531</b>
