The Anti-shock Garment

The Anti-shock Garment is a rubber suit that closes tightly around a woman's lower body. It stops hemorrhage during pregnancy and birth, from ectopic pregnancy, from ruptured uterus, or from other causes, and treats shock by sending blood from the legs to the brain, heart, and lungs. See:

<http://www.safemotherhood.ucsf.edu/nasg/>

https://en.wikipedia.org/wiki/Non-pneumatic_anti-shock_garment

or contact:

Suellen Miller

Director, Safe Motherhood Program

suellenmiller@gmail.com

Online resources

Global Health Media

Visual instruction through videos that teach important skills for mother and baby health, such as delivering the placenta, helping newborn babies breathe, how counting breaths can diagnose illness, and how to help mothers breastfeed.

<https://globalhealthmedia.org/videos/>

Helping Babies Breathe at Birth training video:

<https://globalhealthmedia.org/portfolio-items/helping-babies-breathe-at-birth/>

The Global Library of Women's Medicine

Texts, videos, tutorials and other types of material, designed for a range of health workers, including midwives. Link is for materials on safer motherhood.

https://www.glowm.com/safer_motherhood

ReproLinePlus

Reproductive health resources from **Jhpiego**, including information to improve care during pregnancy, birth and after birth.
