Thanks

It is impossible to adequately thank all the people who made Where Women Have No Doctor a reality. This book started as a good idea shared by a small group of women and ended up as a remarkable international collaboration spanning 5 continents. Now we find ourselves wanting to thank everyone who helped, but simply listing their names does not do justice to the tremendous and generous contributions so many have made: from the groups of women who met early on to discuss topics related to women’s health care, and who later reviewed chapters we wrote based on what they told us; to others who sent us original materials or reviewed (often several times) different sections of the book; to others who wrote drafts of chapters; to the specialists in women’s health care who reviewed parts of or the entire manuscript; and to the artists—women from 23 countries—whose illustrations reflect just how diverse a project this was. We thank you all, for through your combined efforts, this book now rightfully belongs to any woman who reads or uses it.

Wholehearted thanks to the following friends of Hesperian for their work on writing specific chapters, or for contributing the time or ideas that helped complete them:

Abortion: Judith Winkler of IPAS, and Judith Tyson, Breastfeeding: Felicity Savage King, Helen Armstrong, Judy Canahuati, and Nikki Lee, Female Genital Cutting: Jane Kiragu, Leah Muuya, Joyce Ikiaa, the women of Manda-leo Ya Wanawake, Nahid Toubia and Zeinab Eyega of Rainbo, Grace Ebun Delano, Abdel Hadi El-Tahir; and Inman Abubakr Osman, Mental Health: Carlos Beristain, Pregnancy: Suellen Miller, Rape and Violence: Elizabeth Shradër Cox, Sex Workers: Eka Esu-Williams, Women with Disabilities: Judith Rogers, Pramila Balasundaram, and Msindo Mtwinipembe

In addition, we are deeply indebted to Deborah Bickel, Sara Boore, Heidi Broner, Regina Doyle, Susan Fawcus, Blanca Figueroa, Sadja Greenwood, May Haddad, Richard Laing, Lonny Shavelson, Richard Steen, and Deborah Wachtel for their constant availability and selfless efforts. It’s hard to imagine what we would have done without them.

Thanks also to the following groups of women in different countries who contributed so much of their time, hearts, and minds to review these materials and enrich the book: in Bangladesh: The Asia Foundation; in Botswana: Thuso Rehabilitation Centre, Maun; in Brazil: the Association of Community Health Workers of Canal do Anil, and the health educators of Itajai; in Cyprus, Egypt, Jordan, Lebanon, Palestine, Syria, and Yemen: the many groups of women who are members of the Arab Resource Collective; in El Salvador: the women of Morazán and Chalatenango; in Ethiopia: the groups of women who met in Addis Ababa; in Ghana: The Association of Disabled Women, Dorma Ahenkor, the schoolgirls of Wa, and the women of Korle Bu; in Honduras: the women of Ulraco Pueblo; in India: CHETNA, SEWA, Streehitikarini, the women of Bilaspur, Madhya Pradesh; and the women of Tibet; in Kenya: Manda-leo Ya Wanawake—from the districts of Machakos, Kitui, Kerugoya, and Muranga—the Dagoretti Clinic Community Health Workers, the Mwakimai Self Help Group of Kisi, Crescent Medical Aid, the women of Population and Health Services (PHS) of Nairobi, and the women of WOWRI, Nairobi; in Mexico: the women of Ajoya, and the community health promoters of Oaxaca; in Nigeria: the Nigeria Youth AIDS Programme; in Papua New Guinea: the East Sepik Women and Children’s Health Project; in the Philippines: GABRIELA, HASIK, LIKKHAN, REACHOUT, and the People’s Organizations for Social Transformation; in Sierra Leone: the women of Matatie Village; in the Solomon Islands: the women of Gizo; in Uganda: the Kyakabadiima Women’s Group, and WARAIDS; and in Zimbabwe: the Women’s Action Group.

And heartfelt gratitude to the countless others who gave so freely of their time and talents, especially:

About this Book

This book was written to help anyone who lives as a woman and anyone who can become pregnant care for their own health, and to help community health workers or others meet women’s health needs. We have included information useful for those with no formal training in health care skills, as well as information for those who do have some training.

Although this book covers a wide range of health problems, it does not cover many problems that can affect anyone, such as malaria, parasites, intestinal problems, and other diseases. For information on these kinds of problems, see Where There Is No Doctor or another general medical book.

Sometimes the information in this book will not be enough for you to solve a health problem. When this happens, get more help. Depending on the problem, we may suggest:

- **See a health worker.** This means that a trained health worker should be able to help you solve the problem.
- **Get medical help.** This means you need to go to a clinic that has trained medical people or a doctor, or a laboratory where basic tests can be done.
- **Go to a hospital.** This means you need to see a doctor at a hospital that is equipped for emergencies, for surgery, or for special tests.

How to Use this Book

Finding information in the book

To find a topic you want to know about, you can use either the list of Contents or the Index.

The Contents, at the front of the book, lists the chapters in the order in which they appear. There is also a list of contents at the beginning of every chapter. Each topic on this list appears on the numbered page listed as a large heading (words in big, dark letters).

The Index at the back of the book lists all the important topics covered in the book, in the order of the alphabet (a, b, c, d...).

To find information about the medicines used in this book, look in the Medicines Pages toward the back of the book. Page 485 gives more information about using medicines and the Medicines Pages section.

If you do not understand the meanings of some of the words used in this book, you may find them in the Vocabulary that starts on page 548. The first time these words appear in a chapter, they are printed in slanted letters, like this. You can also look up the word in the Index to see if it is explained in another part of the book.

Many chapters end with a section called “Working for Change.” These sections give suggestions for working to improve health in your community, especially for women.
Finding information on a page

To find information on a page, first look over the whole page. You will see that the page is divided into 2 parts: a large, main column and a small column on the outside of the page. The main column gives most of the information about a topic. The small column has additional information that can help you better understand the topic.

Whenever you see a picture of a book in the small column, this means more information about a topic can be found in another part of the book. The words under the book say what the topic is. The page number on the book says where that topic can be found. If there are several topics, the book is shown once and the topics and their page numbers are listed below.

What the different things on a page mean:

Most pages have several headings. The headings in the small column give the general topic that is being discussed on that page. The headings in the main column give more specific topics.

**Some pages also contain medicine boxes, which look like this:**

These boxes tell you the amount of medicine to give, how often to give it, and for how long. Sometimes we recommend medicines without putting them in a box. In either case, look up each medicine in the Medicines Pages before using it.

**Medicine for Breast Infection**

**Medication**

For infection take:
- d-cytoxin ........... 500 mg ............... by mouth, 4 times a day for 7 days.
- erthromycin ........... 500 mg ............... by mouth, 4 times a day for 7 days.

**For fever and pain**

paracetamol (acetaminophen) 500 to 1000 mg 4 times a day as needed (do not take more than 4000 mg in a day).

Before taking medicines, see the “Medicines Pages.”

**Important:** If there is no improvement after 2 days, go to a hospital for treatment.
